INTRODUCTION

Arabian Axis, a registered grade 1 entity, established in the year 2008, began its journey in the Sultanate of Oman, by offering traffic safety furniture to private and government organizations. After gaining momentum in the field, the stakeholders quickly realized the emerging trend of renewable energy solutions in the regions, thus giving birth to Arabian Axis Power.

Arabian Axis Power is an Energy Service Company (ESCO) offering an extended range of sustainable energy and efficient eco-solutions, designing consultancy, customized products, implementation commissioning and maintenance of the same.

With possession of years of experience under our belt, competent technical experts and team along with strong international associations, our organization ensures every project is successfully executed to perfection in a timely manner. This has earned us the reputation of being the "go-to" energy service solution providers in the country.

Our diversified clientele includes government bodies, international organizations and local giants who have energy sustainable solutions as their core values.

We firmly believe in transparency and educating our customers on the viable, cost-effective options available, to help achieve ultimate energy efficiency, with zero compromise on quality.

Arabian Axis Power would like to take this opportunity to extend our hassle-free experience to you and assuring quality, primarily conserving energy for a greener world to live in.

Boilers

ENERGY AUDIT & MANAGEMENT

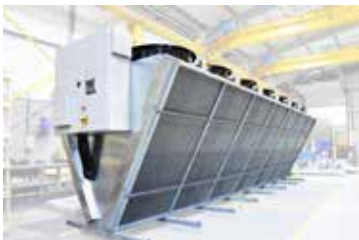

A trained and certified member assesses the property, factory or premises with the intention of identifying and recording energy drainers, thereby enabling them to offer suitable measures in conjunction with the latest practices and technology while addressing the key energy drainers, to minimize the losses and optimize the energy efficiency.

Energy Management

Evaporative Coolers

Adiabatic Coolers

Arabian Axis Power has partnered with ENERCO – an International company which has gained recognition for their expertise in conserving energy. Our team now consists of high profiled engineers with over 35 years of experience in the Energy Industry. Having covered 300+ energy audits across a variety of domains such as Steel, Cement, Textile, Power Plant, Chemical, Oil & Gas, this exposure is what makes us the first choice for any industry. They bring on their set of international regulations and experiences which in return makes assessment easier, optimal and upto mark with the industrial standards and practices.

SOLAR SOLUTIONS

With the regional shift to renewable resources, Arabian Axis has geared itself up as a 'One-Stop-Shop' solar customizable solutions provider.

We cater to as little as 10 Watts to MegaWatt farms for generation of electricity. The range covers Off-Grid systems, On-Grid systems and in special cases Hybrid solutions that could involve the use of Windmills as a source of alternate energy.

LED

Lights as we all know consume a significant amount of energy which in turn reflects in our utilities. However, with the introduction of LED technology, this segment has been largely dealt with, having savings upto 90%.

Arabian Axis possesses LED lighting specialists, who work alongside customers and guide them while opting for the right type of light, color temperature, IP ratings and what is present in the market.

LED Industrial

These luminaires are designed specifically for Factories, Warehouses, Streets, Highways, and Parks etc. where the lights are exposed to the toughest of environments such as low/high temperature, moisture, direct sunlight (UV radiation), wind, hazardous gases etc.

We at Arabian Axis offer our Industrial LED luminaires with upto 5 years warranty, expressing our confidence in the quality of the products we supply.

Lights

Sport Lights

Street Lights

LED Commercial

Arabian Axis chooses largely to focus on Architectural Façade lighting. These lights personify the property's look, making it different from the others.

The fact that LED lights are programmable, allows clients to have a variety of colours and display effects, giving an eye-catching experience every time. In addition to the above, Arabian Axis caters to Indoor, Office, Hotel and Mall lightings too, all in LEDs.

TRAFFIC SAFETY

This department has always been the root of the organization. Decades of understanding and knowledge of local & International Highway standards has pushed Arabian Axis to offer a portfolio of traffic safety products that meet those parameters strictly, as safety is a subject that can never be taken lightly.

Road Signs

LED Safety Signs

Guard Rails & Reflectors

All our products are guaranteed against manufacturing defaults and with the advancement in LED & Solar technology, some of these products can be customized to have them incorporated within, enhancing the driver's visual state of alertness, making traffic movements safer.

The products are made of the finest material, offering quality and budget friendly prices.
